

# WAMP – WordPress local updaten

## Why won't WordPress on localhost find updates?

I've got WordPress running on WAMP. For some reason, when I check for updates to the core and to my plugins, it tells me that everything is up to date, even though I know that I am one version behi...

You could modify the wp-config.php.

And add below code :

```
define('FS_METHOD', 'direct');
```

On my side, it's resolved.
