

mamp – bitnami

mamp – bitnami

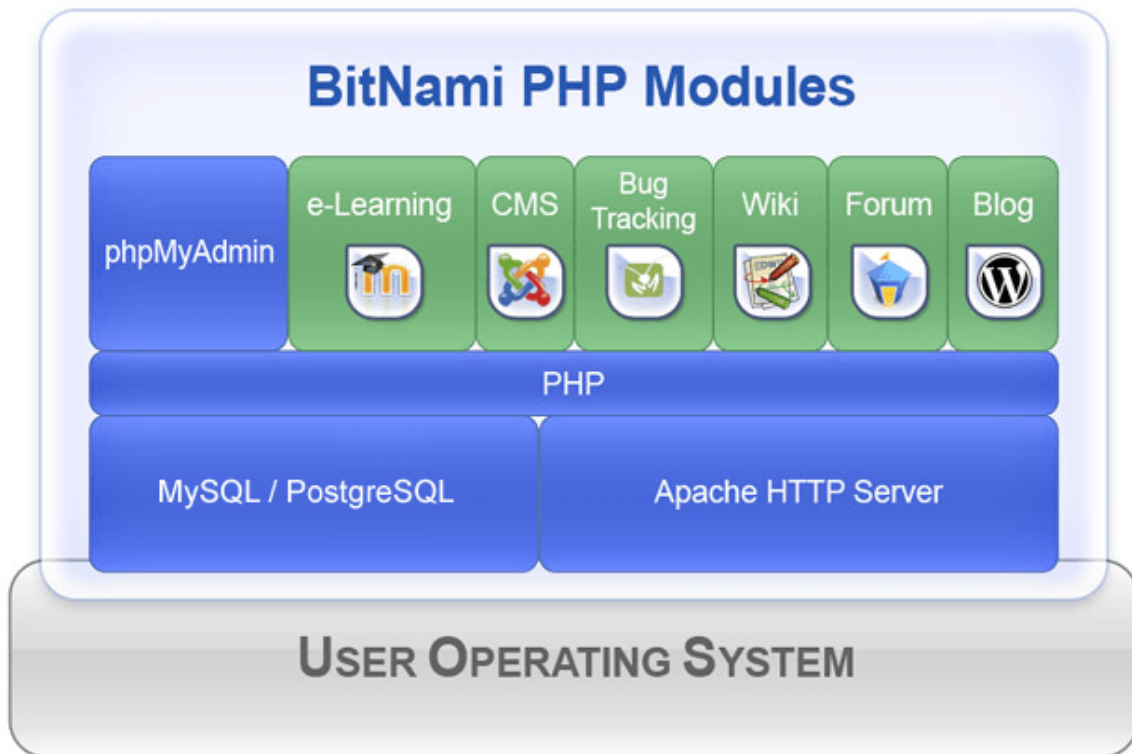

Install MAMP, Download MAMP

Bitnami native installers automate the setup of a Bitnami application stack on Windows, Mac OS and Linux. Each installer includes all of the software necessary to run out of the box (the stack). The process is simple; just download, click next-next-next and you are done!

Getting started

Your Application Dashboard for Kubernetes

Add applications on top of WAMP

You can install several application modules on top of WAMP. That way, all of the Bitnami-packaged applications you want to run will share a single instance of Apache, MySQL or PostgreSQL (depending on the stack) and PHP, which will save space and improve performance.
